

HIGHER EDUCATION™ MANAGEMENT

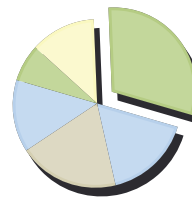

Mined Systems is a trusted advisor to colleges and universities, assisting them with consulting services in key areas of the Higher Education lifecycle. Our team focuses on designing, developing and deploying simple applications for schools that streamline important student services functions such as , education loan and services applications, classroom and course services, endowment, and development management functions.

We provide highly customizable solutions to improve operational efficiency and reduce expenditures and liability. Our team customizes each solution based on the specific needs of the school providing a flexible system for integrating multiple applications residing on different platforms. We can simplify internal processes by creating tools that can combine functions including admission, housing, parking, class registration and more. By combining this data, school administrators can make better-informed decisions.

Mined Systems Applications and Services for Higher Education include:

- **Accounts Receivable Management**
- **Portfolio Liquidity Management**
- **Higher Ed IQ**
- **Development and Endowment Resources**
- **Forecasting and Predictive Modeling**

We have a very special place in our hearts for the college and university community and are committed to creating solutions for even the most complex challenges. We also look to identify ways to further educational opportunities for students through long-term, sustainable financial resources.
